

Addition of Positive Integers Practice Worksheet

1. $7 + 4$
2. $23 + 15$
3. $148 + 32$
4. $467 + 285$
5. $1,250 + 4,832$
6. $56 + 189 + 43$
7. $342 + 1,056 + 89$
8. $2,415 + 3,890 + 764$
9. A library has 1,245 fiction books, 856 non-fiction books, and 340 reference books. What is the total number of books in the library?
10. A manufacturing plant produced 4,280 components in January, 5,125 components in February, and 3,950 components in March. How many total components were produced over the three-month period?

Solutions Key: Addition of Positive Integers

1. **Answer:** 11
Explanation: Basic single-digit addition: $7 + 4 = 11$.
2. **Answer:** 38
Explanation: Add the ones digits ($3 + 5 = 8$) and the tens digits ($2 + 1 = 3$), resulting in 38.
3. **Answer:** 180
Explanation: Add by columns. Ones: $8 + 2 = 10$ (write 0, carry 1). Tens: $4 + 3 + 1 = 8$. Hundreds: 1. Total: 180.
4. **Answer:** 752
Explanation: Column addition with regrouping. Ones: $7 + 5 = 12$ (write 2, carry 1). Tens: $6 + 8 + 1 = 15$ (write 5, carry 1). Hundreds: $4 + 2 + 1 = 7$. Total: 752.
5. **Answer:** 6,082
Explanation: Add standard multi-digit columns from right to left: $0 + 2 = 2$, $5 + 3 = 8$, $2 + 8 = 10$ (write 0, carry 1), $1 + 4 + 1 = 6$. Total: 6,082.
6. **Answer:** 288
Explanation: Add sequentially or group compatible numbers. Notice $56 + 43 = 99$, then $99 + 189 = 288$.
7. **Answer:** 1,487
Explanation: Align by place value and add: $342 + 1,056 = 1,398$; then $1,398 + 89 = 1,487$.
8. **Answer:** 7,069
Explanation: Add sequentially from left to right. First, add $2,415 + 3,890 = 6,305$. Next, add the final term: $6,305 + 764 = 7,069$.
9. **Answer:** 2,441 **books**
Explanation: Sum all categories of books together: $1,245 + 856 + 340$. Adding them yields 2,441 total books.
10. **Answer:** 13,355 **components**
Explanation: Combine the production figures for all three months: $4,280 + 5,125 + 3,950 = 13,355$ components.
